

Shaganti Jennifer Shalom

Hyderabad — jennifershalom02@gmail.com — +91 6303710457 — LinkedIn — GitHub — LeetCode

Professional Summary

Information Technology undergraduate with hands-on experience in full-stack web development and software engineering. Built scalable MERN applications, RESTful APIs, and AI-powered solutions with strong proficiency in Python, SQL, Data Structures Algorithms, Object-Oriented Programming, and database design. Passionate about building secure, efficient, and user-centric software systems.

Technical Skills

Languages: Python, JavaScript, SQL
Web Development: React.js, Node.js, Express.js, REST APIs, FastAPI, HTML5, CSS3
Databases: MongoDB, MySQL, Postgre SQL
AI/ML: Regression, Classification, Clustering, GenAI, NLP, RAG, LLMs
Developer Tools: GitHub, VS Code, Postman, AWS (Basics)

Experience

Future Interns <i>Machine Learning Intern</i>	Remote <i>Certificate</i>
---	------------------------------

Education

Chaitanya Bharathi Institute of Technology <i>B.E. Information Technology – CGPA: 9.13/10</i>	Hyderabad <i>2023 – 2027</i>
Sri Chaitanya Junior College <i>Intermediate (MPC) – 977/1000</i>	Telangana <i>2021 – 2023</i>
Bhashyam High School <i>SSC – GPA: 10.0</i>	Telangana <i>2020</i>

Projects

WanderTales - Built a full-stack MERN travel blogging platform with JWT-based authentication, role-based access control, and secure user management. - Developed scalable REST APIs and interactive features including image uploads, location tagging, likes, comments, and post management using optimized MongoDB queries.	MongoDB — Express.js — React.js — Node.js — GitHub
InvoSense - Invoice Intelligence System - Extracted structured data from PDF and image invoices with 94% accuracy using LayoutLMv3 and Tesseract OCR, enabling automated invoice processing. - Developed ML-based expense classification, anomaly detection, and a RAG-powered chatbot using Sentence Transformers, ChromaDB, and Gemini 1.5 Flash for intelligent document querying.	FastAPI — LayoutLMv3 — OCR — RAG — ChromaDB — GitHub
AeroTrack - Search and Rescue (SAR) System - Built a real-time aircraft monitoring system capable of tracking 6000+ live flights and detecting signal-loss and rapid-descent anomalies using OpenSky APIs. - Predicted search zones through flight trajectory analysis and developed an interactive dashboard with weather, terrain, hospital overlays, and PDF report generation.	Flask — Flask-SocketIO — React — Leaflet.js — GitHub

Certifications

MongoDB Associate Developer – MongoDB, Inc.	<i>Certificate</i>
Salesforce Agentforce Specialist – Salesforce	<i>Certificate</i>

Achievements & Leadership

- Ranked among the **Top 20** out of 200 teams in the **SPINSCI AI Hackathon**.
- Organized and conducted **Tecstasy**, the IT department’s technical fest, managing **15+ technical events**.
- Placement Coordinator, CBIT** — Maintaining the student placement database and coordinating recruiter webinars to support placement activities.
- PR Head, HICON Club** — Led public relations, event promotions, and outreach initiatives, increasing participation in hackathons and technical events.
